

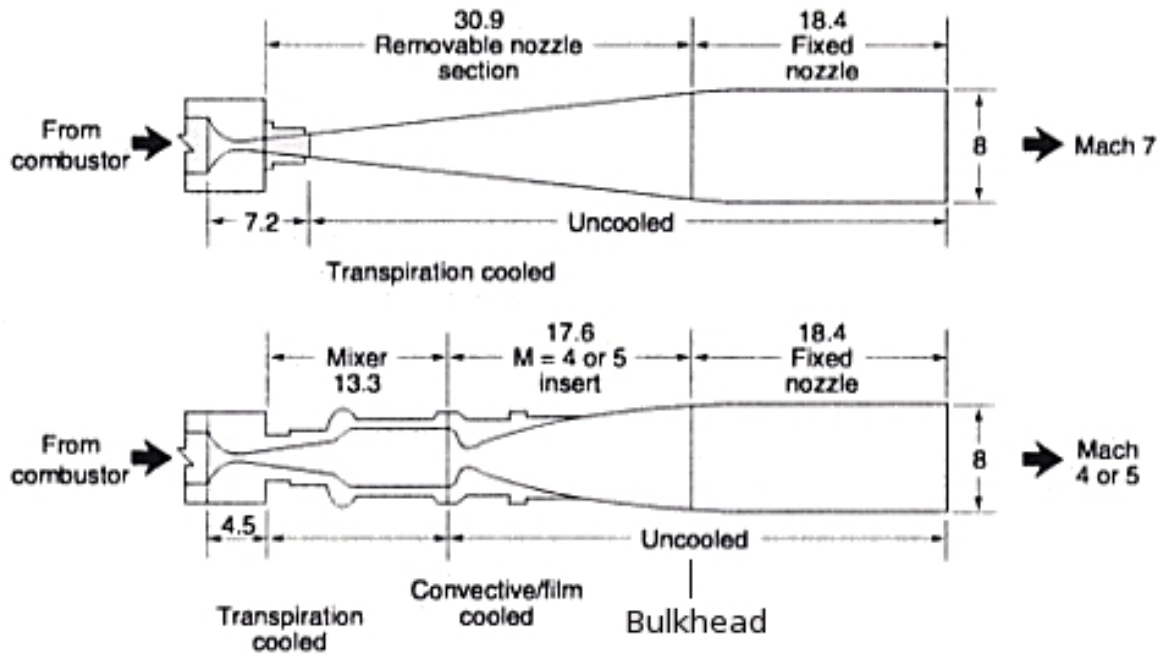

Figure 2. 8-Ft HTT Nozzle Configurations. (Dimensions in Feet)

installed in the 8-Ft HTT while Figure 4 is a photograph of the M5HiQ nozzle exit.

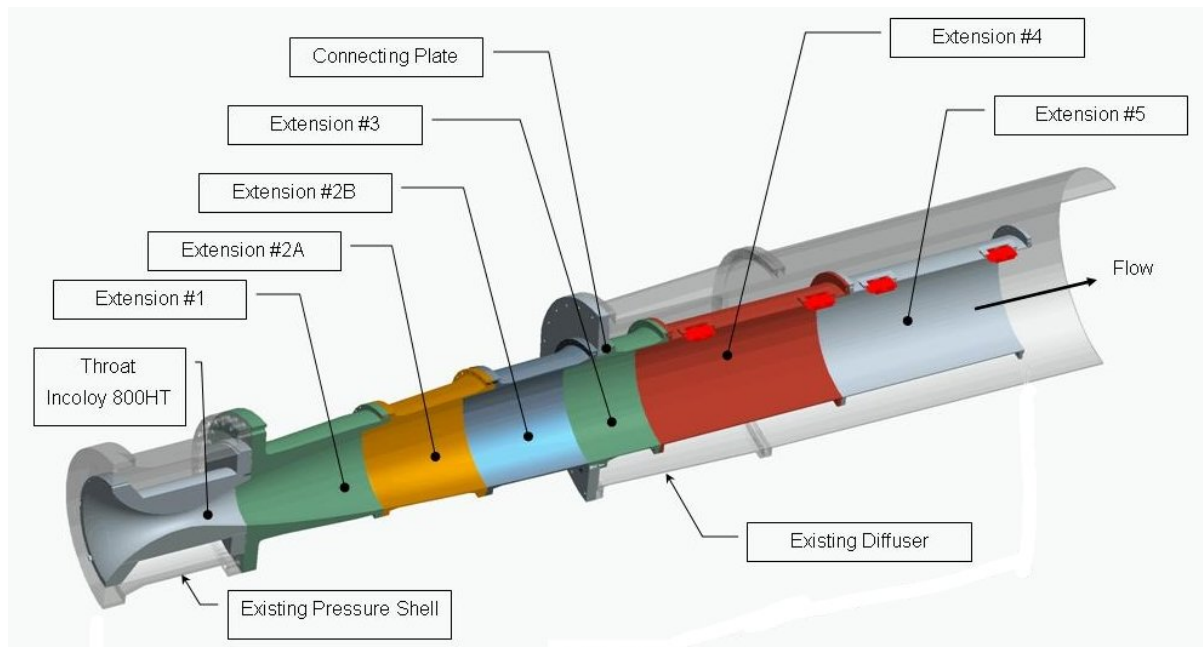

Figure 3. Schematic of the M5HiQ nozzle installed in the facility.

To simplify construction, transportation and installation, the M5HiQ nozzle was manufactured in pieces. Extension 3 of the nozzle begins 5.1 inches upstream of the bulkhead and includes the final 29.5 inches of the contoured section and the first 1.6 inches of the constant area section. The bulkhead was welded to
